We also supply:

Video Installations

Sound Installations

Interaction Design

Controlled Multisensory Stimulation

5.1 Techniques

Extra features:

Hardware Expansion: [optional]
* Ambilight
* Sound effects
* Vibration Elements
* Airconditioning for noise reduction / hardware stabilisation

Software Extensions: [optional]
* Basic internet access
* Direct webcam
* Photo gallery
* Video player / YouTube

Measures:
The measures of the table can be customized. However, one has to keep in mind that the width and length of the table are heavily dependent of the depth. We would therefore advice a width*length*height proportion of 200*80*100 centimeters.

Installing:
After coming to an agreement on the measures of the table with our technical support, we will send out detailed building plans to the carpenters to make sure you get a custom fit.

After this, the Mutli-Touch Cocktailbar will only need to be properly inlayed in the framework of the bar, and you are ready to go.

The bar will need a separate power outlet with it's own fuse, and you will need to keep in mind the inspection door and air outlet which will have to be integrated in the woodwork of the inner side of the bar.
